SUMMARY

Motivated Junior Python Developer with 1.5 years of hands-on experience developing and maintaining backend applications using Python, FastAPI, REST APIs, MySQL, SQLAlchemy, and Git/GitHub.

Strong understanding of Python programming fundamentals, Object-Oriented Programming, exception handling, modules, packages, database operations, API development, authentication, debugging, and testing.

Experienced in working with existing codebases, developing API endpoints, integrating databases, troubleshooting application issues, and collaborating with senior developers to deliver reliable backend solutions.

EDUCATION

Savitribai Phule Pune University

Bachelor of Computer Applications (BCA)

2021 – 2024

EXPERIENCE

Junior Python Developer

January 2025 – Present

TechNova Solutions Pvt. Ltd.

Pune

- Developed and maintained backend applications using Python and FastAPI.
- Created and maintained REST APIs for employee management, attendance, payroll, and user-management modules.
- Implemented API endpoints using GET, POST, PUT, PATCH, and DELETE methods.
- Integrated FastAPI applications with MySQL databases using SQLAlchemy ORM.
- Wrote SQL queries involving CRUD operations, joins, relationships, filtering, and data aggregation.
- Implemented authentication using JWT access tokens and refresh tokens.
- Worked with HTTP-only cookies for secure token storage.
- Implemented role-based authorization for different types of application users.
- Debugged API errors and investigated HTTP status codes including 400, 401, 403, 404, and 500.
- Used Postman to test REST APIs and verify request/response behavior.
- Worked with existing Python codebases and modified existing modules based on business requirements.
- Fixed backend bugs and improved application reliability.
- Implemented asynchronous API operations using async/await where required.
- Created reusable Python modules and utility functions.
- Participated in code reviews and followed team coding standards.
- Used Git and GitHub for branching, commits, pull requests, and version control.
- Collaborated with frontend developers to integrate REST APIs with web applications.
- Assisted senior developers with application architecture, debugging, and deployment tasks.
- Maintained technical documentation for APIs and backend functionality.

Python Developer Intern

July 2024 – December 2024

CodeBridge Technologies

Pune

- Developed Python scripts and backend modules under the guidance of senior developers.
- Created basic REST API endpoints using FastAPI.
- Worked with MySQL databases and wrote SQL queries.
- Implemented CRUD functionality for application modules.
- Tested APIs using Postman.
- Debugged Python application errors and API issues.
- Used Git and GitHub for source-code management.

- Worked with Python virtual environments and package management.
- Assisted in integrating frontend applications with backend APIs.
- Learned software development practices including code reviews, debugging, testing, and documentation.

PROJECTS

Employee Management & HRMS Backend | Technologies: Python, FastAPI, MySQL, SQLAlchemy, JWT, REST API, Git

- Developed backend APIs for an employee management and HRMS application.
- Created APIs for employees, departments, locations, designations, companies, attendance, and payroll.
- Designed database models and relationships using SQLAlchemy.
- Implemented CRUD operations for multiple business modules.
- Created API validation using FastAPI/Pydantic.
- Implemented JWT-based authentication with access and refresh tokens.
- Used HTTP-only cookies for storing authentication tokens.
- Implemented role-based access control.
- Added API error handling and appropriate HTTP status codes.
- Tested APIs using Postman.
- Debugged authentication, database, and API integration issues.

REST API Task Management System | Technologies: Python, FastAPI, PostgreSQL, SQLAlchemy, JWT

- Developed a REST API for task and project management.
- Implemented user registration and login.
- Created JWT-based authentication.
- Developed CRUD APIs for projects and tasks.
- Implemented database relationships between users, projects, and tasks.
- Added authorization to restrict users from accessing unauthorized resources.
- Used SQLAlchemy for database operations.
- Tested API endpoints using Postman.

Python Automation Utility | Technologies: Python, File Handling, JSON, Logging

- Developed Python utilities for processing files and structured data.
- Implemented exception handling and logging.
- Created reusable Python functions and modules.
- Used virtual environments and external Python packages.
- Added validation and error-handling mechanisms.

TECHNICAL SKILLS

Programming: Python

Programming: Object-Oriented Programming (OOP)

Programming: Functions

Programming: Exception Handling

Programming: Lists, Tuples, Dictionaries, Sets

Programming: Modules and Packages

Programming: File Handling

Programming: Async/Await

Programming: Virtual Environments

Backend Development: FastAPI

Backend Development: REST API Development

Backend Development: Flask

Backend Development: HTTP/HTTPS

Backend Development: GET, POST, PUT, PATCH, DELETE

Backend Development: JSON

Backend Development: API Validation
Backend Development: Middleware
Backend Development: Authentication & Authorization
Database: MySQL
Database: PostgreSQL
Database: SQL
Database: SQLAlchemy ORM
Database: CRUD Operations
Database: Primary Keys
Database: Foreign Keys
Database: Joins
Database: Relationships
Database: Database Transactions
Authentication & Security: JWT Authentication
Authentication & Security: Access Tokens
Authentication & Security: Refresh Tokens
Authentication & Security: HTTP-Only Cookies
Authentication & Security: Role-Based Access Control
Authentication & Security: Password Hashing
Development Tools: Git
Development Tools: GitHub
Development Tools: VS Code
Development Tools: Postman
Development Tools: Linux
Development Tools: Command Line
Development Tools: Docker
Development Tools: pip
Development Tools: Virtual Environment
Frontend Knowledge: HTML
Frontend Knowledge: CSS
Frontend Knowledge: Basic JavaScript
Frontend Knowledge: API Integration

CERTIFICATIONS

Python Programming – Certification
FastAPI & REST API Development – Certification
SQL & Database Fundamentals – Certification
Git & GitHub – Certification

KEY STRENGTHS

- Strong Python fundamentals - Backend development - REST API development - Database integration - SQL and database design - Debugging and troubleshooting - Authentication and authorization - Git/GitHub - Fast learner - Logical problem solving - Ability to understand existing codebases - Team collaboration

LANGUAGES

- English - Hindi - Marathi

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge.
